

STATEMENT ON THE MIDDLE EAST SITUATION AND SUPPLY CHAIN IMPACT

Considering the ongoing conflict in the Middle East, we would like to provide an update on the current situation and its potential implications for our operations.

At this stage, we are not facing any supply issues, and our deliveries remain unaffected, as we do not use the routes currently impacted.

However, our supply chain has already signaled that if the situation does not normalize soon, we may begin to see cost increases, driven by higher oil and aviation fuel prices and general freight market pressure.

Today, oil tankers are still moving through certain corridors, but the situation remains uncertain.

We are actively monitoring developments and will continue to implement all necessary measures to ensure continuity of service and timely delivery.

We remain committed to monitoring developments and informing stakeholders of any changes.

Thank you for attention and kind regards.
