

Press Release

HEALTH AND SAFETY CERTIFICATION FOR OUR R&D CENTER IN HADSTEN - DENMARK

A significant milestone in Carlo Gavazzi's ongoing commitment to workplace health and safety.

Lainate, July 2026 - We are proud to announce that **Carlo Gavazzi Industri A/S** - our R&D center based in Hadsten - Denmark - has successfully achieved **ISO 45001:2018 certification**, marking a significant milestone in our ongoing commitment to workplace health and safety.

ISO 45001:2018 is the internationally recognized standard for Occupational Health and Safety (OHS) Management Systems, published by the International Organization for Standardization (ISO). Its objective is to prevent work-related injuries and illnesses, while promoting and safeguarding both physical and mental well-being in the workplace.

The certification process—carried out in collaboration with **MS CERT/EQA**, a leading ISO certification body—spanned approximately one year and involved several key steps: understanding the standard's requirements, documenting internal processes, conducting audits and assessments, and delivering targeted employee training.

Achieving this certification underlines our continued efforts to ensure a **safe, healthy, and sustainable** working environment, and reflects our dedication to producing high-quality products in a responsible and ethical manner.

The **ISO 45001:2018** certificate is now available on our website.
